

# Kitchen Cleaner

# 1

## Description:

Highly concentrated, low foaming, universal kitchen cleaner. Also suitable as soaking agent for dishes and as floor cleaner in the scrubber-dryer.

## Application:

Ecodos Kitchen Cleaner can be used for cleaning all water-resistant surfaces like floors, walls, countertops, kitchen appliances, containers etc. Because Kitchen Cleaner is low foaming, it can be used as soaking agent for dishes (prevents foam from developing in dishwashers). And because of its excellent cleaning features, it is also suitable as simple floor cleaner in the scrubber-dryer. Prevents foam from developing in the machine.

## Usage and dosage:

Dose by way of Ecodos dispenser.

## Soaking method:

Dose 10 ml of product in a bucket or sink filled with maximum 5 litres of lukewarm water. Soak a cloth or sponge in the dilution a wring it until it is moist and clean the surface.

## Soaking agent:

Dose 10 ml of product per 5 litre of cold water.

## Scrubber dryer:

Use a dosage of 0.2% (2 ml per litre of water). Dose the product in the clean water tank of the machine.

## Technical features:

Colour:	Orange
Scent:	Unscented
pH-value concentrate:	9.5
Composition:	Based on raw material from renewable origin. The product is biodegradable according the European Detergent Regulation (EC 648/2004).

## Packaging:

Bag 1.8 litre: 3 pieces in a box

## Safety and storage:
